

## **ILO adopts new measures on occupational safety and health, the employment relationship, asbestos**

Thursday 15 June 2006 (ILO/06/34)

GENEVA (ILO News) - The [95th annual Conference](#) of the International Labour Organization (ILO) has adopted a series of standards and measures addressing health and safety of workers and flexible working arrangements.

Delegates to the annual meeting overwhelmingly adopted a new Promotional Framework Convention on Occupational Safety and Health and accompanying Recommendation.

The ILO estimates that some 6,000 workers die each day as a result of work-related accidents or illness. The new measures will promote the development of a "preventative safety and health culture" by elevating occupational safety and health high on national agendas, through national occupational safety and health programs and the promotion of safer and healthier working environments through preventive measures.

The measures are based on the ILO's Global Strategy on Occupational Safety and Health adopted by the 2003 International Labour Conference which emphasized the importance of building and maintenance of a national preventative safety and health culture, and a systems approach to safety and health.

Delegates also adopted an international labour Recommendation on the Employment Relationship. The new standard proposes to member States the formulation and adoption, in consultation with workers and employers, of national policies on effectively establishing the existence of an employment relationship and on the distinction between employed and self-employed workers; combating disguised employment relationships and ensuring standards applicable to all forms of contractual arrangements.

The Conference also adopted a Resolution asbestos exposure, which causes approximately 100,000 deaths worldwide per year. The Resolution declares that eliminating the future use of asbestos and identifying and properly managing asbestos currently in place are the most effective means to protect workers from asbestos exposure and to prevent future asbestos-related diseases and deaths. It also resolves that the [ILO's Asbestos Convention 1986 \(No. 162\)](#) should not be used to provide a justification for, or endorsement of, the continued use of asbestos.
